

- ▶ “I run a unique business. Packaged software does not work for us.”
- ▶ “I have limited visibility across my organization. I’ve got to see what’s going on.”
- ▶ “I need to make it easier for everyone to work with us to ultimately drive more sales. Customers, partners and employees need to connect with me over the Web.”

For more than 15 years, TwinEngines has helped companies that have told us: “Our processes cannot be automated. We’ve looked and never found a solution to fit our needs. Our business is so different. It’s too expensive to get what we really need.” If we can help them, we can help you. TwinEngines builds custom shop floor, front office and web portals to let you truly see what is going on across you organization and value chain. What’s the result? A more effective, agile and connected operation.

TwinEngines helps synchronize the flow of data across your organization and increase visibility into every facet of your business.

WHY TWINENGINES:

▶ **CEO/OWNERS**

- Recognize that existing financial/ERP solutions address between 80-90% of functional needs. We take care of the rest and can help turn your unique business processes into a competitive advantage.
- Run your business the way you want —we don’t make you change your processes.

▶ **IT**

- Secure a platform to consolidate existing custom applications and build new ones, either internally or externally.
- Get the manufacturing IT software development skills you need but may not want to permanently hire.
- Link silos of data into a single view.

▶ **OPERATIONS**

- Rely on our deep knowledge of manufacturing to identify the right solution for your specific needs.
- Have visibility from the front office to the shop floor to across the supply chain.
- Make your life easier by improving job tracking, data collection and resource planning.

▶ **SALES**

- Connect your vendors, dealers and customers to your front office and shop floor operations.
- Provide cost-effective customer service.
- Enable anytime, anywhere access to sales and customer data.
