

- ▶ “I am tired of using spreadsheets to run my business.”
- ▶ “Off-the-shelf packages don’t work for us.”
- ▶ “I have an MRP/ERP system, but it serves our financial needs, not my operational ones.”

You do things differently. So do we. We know manufacturing and have spent more than a decade delivering custom solutions for small and mid-market companies that address the gaps left by MRP/ERP and spreadsheets. As a result, we quickly grasp your distinctive business process and deliver a solution fit to your needs—one that doesn’t cost a small fortune or require the replacement of your existing business system.

GAIN VISIBILITY INTO YOUR OPERATIONS AND ACROSS ALL DEPARTMENTS, AND BRIDGE THE CHASM BETWEEN THE SHOP FLOOR AND THE FRONT OFFICE.

Our tailored solutions give you the ability to run your shop floor the way you want; build data collection into your business process versus treating it as a separate step; deliver order instructions in a usable format to shop floor operators; and manage by exception to proactively react to changes versus having changes run your business.

TwinEngines has experience developing and integrating custom solutions for the following areas, and we can quickly build additional ones based on your specific needs.

TWINENGINES can help address these latest trends that may be causing changes in your business:

▶ LEAN

- Adapt to shifts on the shop floor including shorter product runs with a higher product mix.
- Eliminate wasted efforts with integrated data collection on the shop floor.
- Get the operational data you need—that ERP doesn’t provide—to integrate IT applications into a lean environment.

▶ THE REAL-TIME ENTERPRISE

- Provide day-to-day operational data to your customers, suppliers and employees, when and where they need it.
- Have the ability to react to changes in customer demand, supply, conditions on the shop floor, etc.
- Use touch screen terminals and mobile devices for data collection and management.

▶ EXTENDING TO THE WEB

- Eliminate internal manual data management processes.
- Supply information transparently to constituents across your value chain.
