

- ▶ “We need to get control of our data, including seeing it when and how we want.”
- ▶ “We don’t want to replace our ERP system. We just need to extend it to suit our business.”
- ▶ “We need someone that knows our existing technology and our industry.”

Maybe your IT systems are old, your IT staff is non-existent or your data has grown from a small Microsoft Access file to something that is out of control. Regardless of your IT situation, TwinEngines can help you tackle your technology challenges. We have spent over 15 years delivering custom solutions for small and mid-market companies that connect their operations and help them address the gaps left by new or aging systems or even retiring IT personnel. As a result, we quickly grasp your distinctive business processes and can deliver a solution that delivers the best fit and value.

GET A CUSTOM APPLICATION TO REFLECT YOUR BUSINESS PROCESSES AND KEEP YOUR COMPETITIVE ADVANTAGE.

We’ve helped companies move data from spreadsheets to the shopfloor to the web; integrate all types of technology applications; and leverage our diverse range of IT skills—from analytics to databases to programming—to gain and maintain a competitive advantage. Let us help you do the same.

TwinEngines can apply our consulting, manufacturing and systems expertise in the following areas, as well as others, to develop a custom solution that meets your needs. Our knowledge base is extensive. Please inquire about technologies or integrations that are not listed.

Contact us to learn why TwinEngines is the perfect, long-term IT partner to ensure your company runs smoothly both now and in the future.

TWINENGINES has the experience needed to solve your custom technology needs:

▶ COMPETITIVE ADVANTAGE

- Get a custom solution that reflects your business processes instead of being forced down a best-of-breed path from off-the-shelf software. Only customer solutions can deliver the competitive advantage that you need to keep your business agile, effective and connected.

▶ MANUFACTURING EXPERTISE

- Rely on our deep knowledge of manufacturing to quickly understand your business and identify the right strategy and solution for your needs. Many of our team members have degrees in industrial engineering.

Our vertical industry knowledge includes:

- Discrete
- Job shops, including electrical and metal stamping
- Graphics companies
- Repair facilities
- Distribution companies
- Plus others

▶ CONSULTING EXPERIENCE

- Turn to our years of experience delivering advice and solutions that transform market challenges into increased productivity and profits.

▶ MICROSOFT FOCUS

- Depend on our status as a Microsoft Gold Certified Partner and our expertise with Microsoft products to build or extend the right technology platform for you.
